

ABSTRACT

To provide a foamed film or multilayer foamed film excellent in heat insulating properties, a heat shrinkable foamed film or heat shrinkable multilayer foamed film made thereof, a heat shrinkable label, and a container covered therewith.

A styrene foamed film characterized by having at least one foamed layer which contains a resin composition comprising from 20 to 100 parts by mass of the following (a) and from 0 to 80 parts by mass of the following (b) and which has a thickness of from 30 to 200 μm and a specific gravity of from 0.3 to 0.9:

(a) a block copolymer wherein the ratio of a vinyl aromatic hydrocarbon to a conjugated diene is from 50/50 to 90/10,

(b) at least one vinyl aromatic hydrocarbon polymer selected from the following (i) to (v):

- (i) a block copolymer of a vinyl aromatic hydrocarbon with a conjugated diene,
- (ii) a vinyl aromatic hydrocarbon polymer,
- (iii) a copolymer of a vinyl aromatic hydrocarbon with (meth)acrylic acid,
- (iv) a copolymer of a vinyl aromatic hydrocarbon with a (meth)acrylate, and
- (v) a rubber-modified styrene polymer.
